

Harinath M

I am a seasoned Full Stack Developer with 7+ years of experience, specializing in front-end and back-end technologies, including React.js, Angular, Node.js, PHP, Laravel, MongoDB, and MySQL. As a Technical Lead, I excel at guiding teams to deliver high-quality software solutions through transparent communication and a commitment to continuous improvement.

Passionate about innovation and problem-solving, I thrive in dynamic environments where I can leverage my skills to build scalable, impactful solutions. Dedicated to lifelong learning, I stay ahead of industry trends and am motivated to exceed expectations while driving positive change through technology.

WORK EXPERIENCE

GyrIT Solutions Pvt Ltd, Bangalore.

Technical Lead

Mar 2023 - Present

- Successfully led cross-functional technical teams to design, develop, and implement robust software solutions, ensuring scalability, security, and high performance.
- Architected and optimized complex software systems, improving efficiency and supporting future scalability.
- Mentored junior developers, fostering a collaborative team environment and promoting continuous learning and skill development.
- Implemented best practices for coding, testing, and deployment, reducing errors and improving development timelines.
- Spearheaded the adoption of agile methodologies, streamlining project execution and achieving 15% faster delivery cycles.

Axiomlo, Bangalore.

Software Development Engineer

Feb - 2022 - Jan - 2023

- Played a key role in the complete software development lifecycle, including requirements gathering, design, development, testing, and deployment.
- Developed and maintained a high-quality, scalable codebase, adhering to industry best practices and coding standards.
- Collaborated with cross-functional teams, including product managers, designers, and QA specialists, to deliver innovative and user-centric software solutions.
- Optimized existing code and introduced performance improvements, reducing system latency by 20%.
- Actively contributed to the adoption of modern development tools and techniques, enhancing team productivity and project outcomes.

DALVKOT, Bangalore.

Software Developer

Sep - 2021 - April - 2022

- Contributed to the successful development of two critical projects: **Inventory Management System (IMS)** and **Hospital Management System (HMS)**, driving operational improvements and efficiency.
- Leveraged **PHP**, **Node.js**, and **Angular** to enhance pharmacy operations within IMS, optimizing inventory tracking processes and reducing operational costs by 25%.
- Designed and implemented tailored solutions for HMS to meet hospital-specific requirements, streamlining patient data management and improving inter-departmental communication.
- Delivered enhanced patient care and operational efficiency by integrating secure data handling and seamless workflow automation.
- Collaborated closely with stakeholders and cross-functional teams to ensure project objectives aligned with business needs and delivered on time.

Freelancer

Aug - 2019 - Dec - 2020

Delivered customized web solutions independently, meeting client specifications and strict deadlines.
Leveraged web development expertise to create scalable and user-friendly applications.
Maintained clear client communication to ensure satisfaction and project success.

PRVIGA Solutions Pvt Lmt, Chennai.

Software development trainee

Jun - 2018 - May - 2019

- Acquired practical experience in software development methodologies, coding, testing, and debugging.
- Supported senior developers in building and optimizing software applications.
- Participated in training sessions and workshops to enhance technical skills and stay updated on industry trends.

EDUCATION

Indira Institute of Engineering and Technology, Anna University Chennai

Bachelor Of Technology(IT) - 6.06

June 2012 - June 2016

PROJECT

Advertiser Services Enhancement Project – Los Angeles Times [🔗](#)

- Led the migration of a critical web application from **Angular 5 to Angular 15**, ensuring compliance with modern industry standards and best practices.
- Utilized **TypeScript** and Angular frameworks to enhance application performance, scalability, and maintainability.
- Streamlined processes and improved advertiser communication through enhanced tools and features, driving increased campaign effectiveness and customer satisfaction.
- Delivered a seamless migration while maintaining application stability and meeting project deadlines.

Cryptoforce – Cryptocurrency Exchange Platform [🔗](#)

- Contributed to the redevelopment of a secure and scalable cryptocurrency exchange platform tailored for the Indian market.
- Implemented backend logic using **Node.js** and **PHP Laravel**, ensuring robust performance and seamless user experiences.
- Optimized database operations with **MySQL**, improving query efficiency and system reliability.
- Enhanced platform security and usability, catering to the needs of both novice and experienced crypto traders.
- Delivered a user-friendly interface with advanced features, boosting customer engagement and satisfaction.

Widuni – No-Code/Low-Code Platform by Prviga.com [🔗](#)

- Contributed to the development of a no-code/low-code platform using **PHP**, **JavaScript**, and **MySQL**, empowering users to build and manage applications with minimal technical knowledge.
- Designed and implemented key features to simplify workflows, enabling businesses to create scalable and efficient solutions quickly.
- Optimized backend processes and database interactions, ensuring high performance and reliability.
- Delivered a user-friendly interface tailored to enhance usability for diverse business needs.

E-Commerce Platform Development:

- Designed and developed a full-stack e-commerce platform using **React**, **Node.js**, **PHP**, and **MySQL**, integrating secure payment gateways and implementing user authentication. Optimized database queries, reducing page load times by 40% and enhancing user experience.

Employee Management System:

- Created a web-based employee management system for mid-sized companies using **Angular**, **Laravel**, **CodeIgniter**, and **MySQL**. Implemented role-based access control and real-time updates using **WebSockets** for seamless user interaction. Deployed the system on AWS for high availability and scalability.

Healthcare Appointment Booking System:

- Developed a full-stack web application for booking healthcare appointments using **React**, **Node.js**, **PHP**, **Laravel**, and **MongoDB**. Integrated third-party APIs for real-time availability and booking of healthcare professionals. Implemented secure user authentication using **JWT** and session management. Deployed the application on Heroku, ensuring scalability and monitoring performance with tools like New Relic.

SKILLS

- **Front-end:** HTML, CSS, JavaScript, TypeScript, React.js, Angular, and Laravel Blade.
- **Back-end:** PHP, Node.js, CodeIgniter, Express.js, and RESTful API design.
- **Databases:** MySQL and MongoDB.
- **Tools:** Git, and working with CI/CD pipelines.
