Whom am I?

I'm a seasoned Full Stack Developer with six years of experience, specializing in both front-end and back-end technologies. As a Technical Lead, I excel in guiding teams to success through transparent communication and a focus on continuous improvement. I thrive in dynamic environments, driven by a passion for innovation and problem-solving. Committed to staying updated with the latest industry trends, I am dedicated to lifelong learning. I am motivated by the opportunity to build impactful software solutions that exceed expectations and drive positive change.

What have I achieved in my education?

Bachelor of Technology (B.Tech) in Information Technology (IT)

Indira Institute of Engineering and Technology, Anna University Chennai

Year of Graduation: 2016 , Percentage: 60%

What capabilities do I possess?

Highly skilled and experienced in web and mobile development, proficient in PHP, Laravel, Doctrine, SQL, Angular, Ionic, Node.js, MongoDB, and Git. Capable of designing, developing, and deploying dynamic and scalable applications, with expertise in both backend and frontend technologies. Experienced in database management, RESTful API development, and version control, with a proven track record of delivering high-quality solutions.

FRONTEND

- Angular
- Ionic

BACKEND

- PHP
- Laravel
- Doctrine
- Node.js

DATABASE

- SQL
- MongoDB

What notable projects have I completed in each role?

Technical Lead – GYRIT SOLUTIONS PVT LTD, Bangalore (16.03.2023 to Present)

Led technical teams in the development and implementation of software solutions. Architected and designed complex software systems, ensuring scalability and performance. Mentored junior developers, fostering a culture of continuous learning and improvement.

1. Los Angeles Times - Advertiser Services Enhancement Project

The Advertiser Services Enhancement Project aims to improve the advertiser experience at the Los Angeles Times. By streamlining processes, enhancing communication, and providing valuable insights and tools, it aims to boost advertising campaign effectiveness. These enhancements seek to strengthen the relationship with advertisers, driving revenue and customer satisfaction. **Led the migration of a critical web app from Angular 5 to Angular 15**, ensuring adherence to industry standards.

- ✓ Implemented sprint-wise methodology for efficient development and timely milestones.
- ✓ Collaborated with UX/UI designers to integrate new designs, enhancing user experience.
- ✓ Conducted code reviews and provided guidance, fostering team improvement.
- ✓ Worked closely with QA to ensure application stability and performance.
- ✓ Actively participated in Agile ceremonies to drive project progress.
- ✓ Communicated project updates to stakeholders, aligning with business objectives.

2. Healthcare Applications :

I have proficiently developed healthcare applications using Ionic Angular and Node.js. Leveraging these technologies, I contributed to creating robust, user-friendly applications tailored to the healthcare sector. My expertise includes seamless integration of front-end and back-end functionalities, ensuring efficient and secure data management in healthcare environments.

Software Development Engineer – AXIOMIO, Bangalore (02.05.2022 – 31.01.2023)

Contributed to the full software development lifecycle, from requirements gathering to deployment. Developed and maintained high-quality codebase following best practices and coding standards. Collaborated with cross-functional teams to deliver innovative software solutions.

Software Developer

1. Cryptoforce – Cryptocurrency exchange platform.

Played a pivotal role in the redevelopment of Cryptoforce, a prominent cryptocurrency exchange platform, utilizing a diverse tech stack including Vue.js for frontend development, Java for backend logic, Node.js for real-time data processing, and PHP Doctrine for database management. Focused primarily on PHP Doctrine, I optimized database interactions, ensuring efficient data storage and retrieval. Collaborated with cross-functional teams to implement new features and enhance platform functionality, contributing to an improved user experience and system performance.

Software Developer – DALVKOT, Bangalore (23.09.2021 – 30.04.2022)

At DALVKOT, I contributed to the development of two pivotal projects: **IMS (Inventory Management System)** and **HMS (Hospital Management System)**. Leveraging PHP, Node.js, and Angular, I optimized pharmacy operations in IMS, enhancing inventory tracking and reducing operational costs. In the **HMS project**, I tailored solutions to hospital needs, refining patient data management and facilitating seamless departmental communication to enhance patient care and operational efficiency.

Web Developer – We4 Technologies Pvt Lmt, Chennai(05.01.2021 – 06.09.2022)

As a Web Developer at WE4 Technologies PVT LTD, I specialized in crafting web applications using Laravel. My role involved designing and developing robust solutions to meet client requirements, leveraging Laravel's powerful framework to deliver efficient and scalable web applications.

Freelancer – Chennai (Aug-2019 to Dec -2020)

Independently handled web development projects for clients. Demonstrated flexibility and adaptability in meeting project specifications and deadlines. Leveraged expertise in web development to deliver customized solutions tailored to client requirements.

Software Developer Trainee – Chennai (19.06.2018 – 24.05.2019)

Gained hands-on experience in software development methodologies and technologies. Assisted senior developers in coding, testing, and debugging software applications. Participated in training sessions and workshops to enhance technical skills and knowledge.

Declaration :

I offer a proven record of success and expertise. Skilled in PHP, Laravel, Doctrine, SQL, Angular, Ionic, Node.js, MongoDB, and Git, I am passionate about driving innovation and exceeding expectations in fast-paced environments. I am eager to contribute to the success of your team.

Thank you
